SMART ORDER

now that's an order!

Smart Order

Smart order provides a new and exciting medium to engage your customers by giving them a visually rich and appealing way to browse through the menu and order.

SmartOrder is the fastest way to order food - As soon as the order is placed through the tablet, it is registered automatically in the cash counter and a Kitchen-Order-Ticket(KOT) is generated in the kitchen.

The automatic addition of the order at the cash counter and the kitchen takes off the monotonous and heavy burden of the staff, making them more relaxed, happy and they can serve the customers better.

K.O.T System

SmartKOT is a lighter version of SmartOrder has been designed keeping in mind the extreme rush during business hours faced by the staff.

The Captains are expected to handle all the customers, get all the orders, manage the delivery times, and also handle customer issues !!

SmartKOT solves this problems by providing the fastest way for the captains to take orders. SmartKOT adds the order at the cash counter, and simultaneously prints the KOT from a wireless printer kept in the kitchen. This reduces the transit time for the captain and he can instead focus on keeping the customers happy ! SmartKOT also includes Feedback module which enables the captains to take feedback from the same device ! !

“Smart order is a complete restaurant management system which includes ordering, billing, inventory, accounts , feedback and conceirge. ”

“SmartKOT can be used either by handing over tablets to captains or placing Tablets at convenient places in the restaurant from where orders can be placed.”

“The only complete PC less solution ! No computers ! only tablets and printers.”

KOT System

Inventory Management

"POS system is a ground breaking technology which provides the fastest, smallest, sleekest touch screen system."

P.O.S

POS system consists of a tablet and a wireless printer. POS system has ordering, billing, inventory, accounts packaged as an all-in-one system. POS system allows the restauranter to manage all the different aspects of the restaurant.

POS system boasts of the best in class reporting module which shows a graphical reports thus helping the restauranter to do an in-depth analysis of various reports.

FeedBack

Feedback system enables your patrons to voice their opinions on all matters ranging from your restaurant ambience to the spoons provided with a certain soup !

The best part of the feedback system is that it can combine feedbacks with the orders and hence recreating the total customer experience !! This helps restauraners to pin point the flaws at each and every level. An intelligent mailer system also sends automatic feedback reports to the management.

Concierge

Concierge

Conceirage system helps restaurants to manage their waiting guests smoothly !

Conceirage system helps you to add all your waiting guests in a list.

Guests can also recieve an sms which will tell them of tables getting vacant.

"The awesomest business ally benefits to your restaurant !!"

"Intelligent routing for KOT / BOTS."

Today, Tablets PC's have more computing power than all of NASA in 1969. NASA launched a man to moon. Is it time to launch a new glory to your restaurant ??
